ACCESSORIES

• FM indoor antenna 1
(T90-0182-15)

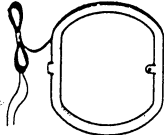

• AC plug adaptor 1
(E03-0115-05)

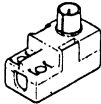

*Except for the U.S.A., Canada, Europe,
U.K. and Australia. For the unit with a
European AC plug in areas other than
Europe.*

• AM loop antenna ass'y 1
(T90-0195-05)

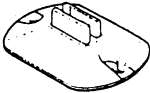

• Antenna adaptor 1
(T90-0198-05)

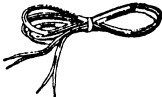

For U.K. and Europe.

Loop antenna stand
(J19-3645-05)

• Speaker cords 2
(E31-5479-08)

For U.K. and Europe.

• Remote control unit (RC-E5) 8
(A70-0981-05)

Battery cover
(A09-0106-08)

• Batteries 2

**Speaker cords are packed with the Speakers.*

System configuration

System	Receiver/Multicommand	Cassette deck/CD player	System carton box (Parts No.)	Speaker (Other package)
UD-502	A-E5/L	X-E5	H60-0225-04	LS-E5
UD-552	A-E5/L	X-ME5	H60-0268-04 (K) H60-0227-04 (other)	LS-E5

2

CONTROL

RECEIVER SECTION

1 POWER key

Press to turn the power of the system ON/OFF.

2 EQ. EFFECT key

Press to select an equalizer curve.

3 ACTIVE N.B. key

4 VOLUME CONTROL knob

5 MIC jack

6 MIC MIXING knob

7 DUAL SOUND MIXING knob

Adjust the volume balance between the environmental sound and music.

8 DEMO key

Press to start demonstration.

9 LONG PLAY mode key

Press to let the sound play for long hours.

10 PRESENCE key

Press for presence play.

11 DUAL SOUND key

Press for Environmental Sound play or presence mode play.

12 DEPTH key

Press to add a depth in the sound field.

13 BALANCE keys (LEFT, RIGHT)

Press to adjust the balance between the left and right volume levels.

14 PHONES jack

Insert headphones into this jack.

CONTROL

MULTI COMMAND UNIT SECTION

1 REC/ARM key

2 DUBB. keys (HIGH, NOR.)

Press for tape dubbing

3 Input selector keys

CD: Functions as the play/pause key.

TAPE: Functions as the play key.

Pressing during playback changes the tape transport direction.

TUNER: Functions as the BAND key.

AUX: Press to play the AUX input source.

4 ENTER key

5 ONE TOUCH EDIT key

Press for simplified CD recording

6 DIRECTION switch key

7 Deck switch keys (A/B)

Press to select the deck to be operated.

8 DOLBY NR key

9 COUNTER RESET key

Press to reset the tape counter to 0000.

10 CCRS/CRLS key

11 Fast winding (TUNING) keys

CD, TAPE: Function as the fast forward/backward keys.

TUNER: Function as the TUNING keys.

When power is OFF:

Used to set the timer.

12 Stop (AUTO) key

CD, TAPE: Functions as the stop key.

TUNER: Functions as the AUTO key.

When power is OFF:

Activates the clock adjustment mode.

13 Skip (P.CALL) keys

CD: Function as the skip keys.

TAPE: Function as the skip key, to search the beginning of music programs.

TUNER: Function as the P.CALL keys.

When power is OFF:

Used to adjust the clock or timer operation.

DISASSEMBLY FOR REPAIR

Remove the case in advance.

A) Rear panel

- 1 Disconnect CN8 of X09-402 (C/7).
- 2 Remove the 12 screws (❶) of the Rear panel.

B) TUNER PCB X05-4460-XX / X05-4472-70

- 1 Disconnect CN1.
- 2 While pushing the unit holder, pull the PCB.

C) Front panel

- 1 Remove the two screws (❷) of the lower side of the panel.
- 2 Remove the left part of the panel first. Right part, CN7 and CN6 (X09-404 (B/7)) are connected, so remove the panel carefully.
- 3 When removeing the PCB, remove the VOLUME CONTROL knob (❸) by loosening the Allen screws.

Caution : If Front panel is removed, you can not operate A-E5/L. Don't remove the Front panel when checking the PCB.

●:❶ x12

▲:No need to remove

CIRCUIT DESCRIPTION

μ-com: M381907MA-074FP (X14: IC4)

1. Test mode

1-1 Test mode with the main unit keys

(1) Setting procedure

While pressing the CD key, plug the AC power cord to the power outlet.

(2) Cancellation

Unplug the AC power cord. The initial setting will take effect and the test mode will be canceled.

(3) Description

1. Auto POWER ON

- When AC power cord is plugged while pressing the CD key, the POWER will turn ON and all function will be at the initial setting. (Input selector=TUNER)

2. ALL LED ON mode

- When The AC power cord is plugged while pressing the CD key, all the LEDs will turn ON.
- Two colours LED change to GRN and RED alternately. (250ms interval)
- When some main unit key is pressed, ALL LED ON mode will be canceled and all function will return the LEDs to normal.

3. Others

- The operation of main unit keys and remote controller keys during the test mode, refer to the table below.
- The MUTE function does not work during the test mode. (When POWER ON, MUTE is effective.)
- Test mode is not canceled when the input selector is moved TUNER to another source.
- Headphone detection is effective during the test mode.

1-2 Test mode with serial communications

(1) Setting procedure

- Enter the TEST ON code. (C27FH)

(2) Cancellation

- Enter the TEST OFF code (C27EH) (Not initialized)
- Unplug the AC power cord. (Initialized)

(3) Description

- The MUTE function does not work during the serial test mode.
- When the codes are received, the same codes are transmitted.
- Codes received during the serial test mode are effective irrespective of the display mode.
- All the LEDs will turn ON. ALL LED ON is cancelled by inputting the cancelling code and returned the LEDs to normal.
- Headphone detection is effective during the test mode.
- Inputting codes of numeric key call memory. (+10 key code is as same function as normal tuner function.)
- Headphone detection is effective during the serial test mode.

	Key	Description		Key	Description

CIRCUIT DESCRIPTION

PS-93UA or PS-94UA Operation Manual

Power supply for the audio model UD series.

Audio signal lines in 15P and 19P flat cable are connected to RCA connectors.

< Explanation of the Function >

① POWER SWITCH

This switch should be turned on when using the 15 pin PRE CD DECK ③, the 19 pin PRE CD DECK ⑤ and the 4 pin power supply ⑦.

② 15 PIN POWER AMP

Connect to a system which require the 15 pin flat cable for connection, when check the power amp. section.

AC power source is not output from the terminal.

The signals are input and output to the RCA terminals and SYNC terminal on the front panel.

(ex : A-711, A-722, A-A7, B-922, B-A9, etc)

CIRCUIT DESCRIPTION

③ 15 PIN PRE CD DECK

Connect to a system which require the 15 pin flat cable for connection, when check the functions except power section AMP.

The AC power are supplied to the pin No.12-13 for 9 V and the pin No.14-15 for 16 V from the terminal.

The signal flow are same as 15 pin power AMP terminal.

(ex : DP-711, DP-722, DP-A7, C-922, X-711, X-722, X-A7, etc)

④ 19 PIN POWER AMP

Connect to a system which require the 19 pin flat cable for connection, when check the power AMP section.

The AC power is not supplied in the terminal.

The signals are input and output to the RCA terminal on the front panel.

(ex : A-B7, A-B3, B-B9, A-E5, A-E7, B-E9, etc)

⑤ 19 PIN PRE CD DECK

Connect to a system which require the 19 pin flat cable for connection, when check the component except power AMP. This terminal have the 4 system AC power supplies which is located to the pin No.13 to pin No.19.

(ex : X-B9, X-B5, X-B3, C-B9, DP-B5, DP-MB5, X-E5, X-ME5, X-E7, X-ME7, DP-E9 X-E9, C-E9 etc)

⑥ SYNC TERMINAL

Connect to the SYNCHRO CHECK JIG KSJ-0816. It can be controled the system code 8 bit or 16 bit to the test set.

⑦ 4 PIN POWER SUPPLY

Output terminal for AC 9 V and AC 16 V.

It can be used supply the AC power to DECK, CD, TUNER for MIDI system.

⑧ TAPE SWITCH

The signal for deck of 19 pin terminal are share a well with the REC and PLAY. So, please change the TAPE SW when DECK mode is PLAY or STOP then turn to the play, when DECK mode is REC or REC pause then turn to the REC.

(ex : X-B9, X-B5, X-B3, X-E9)

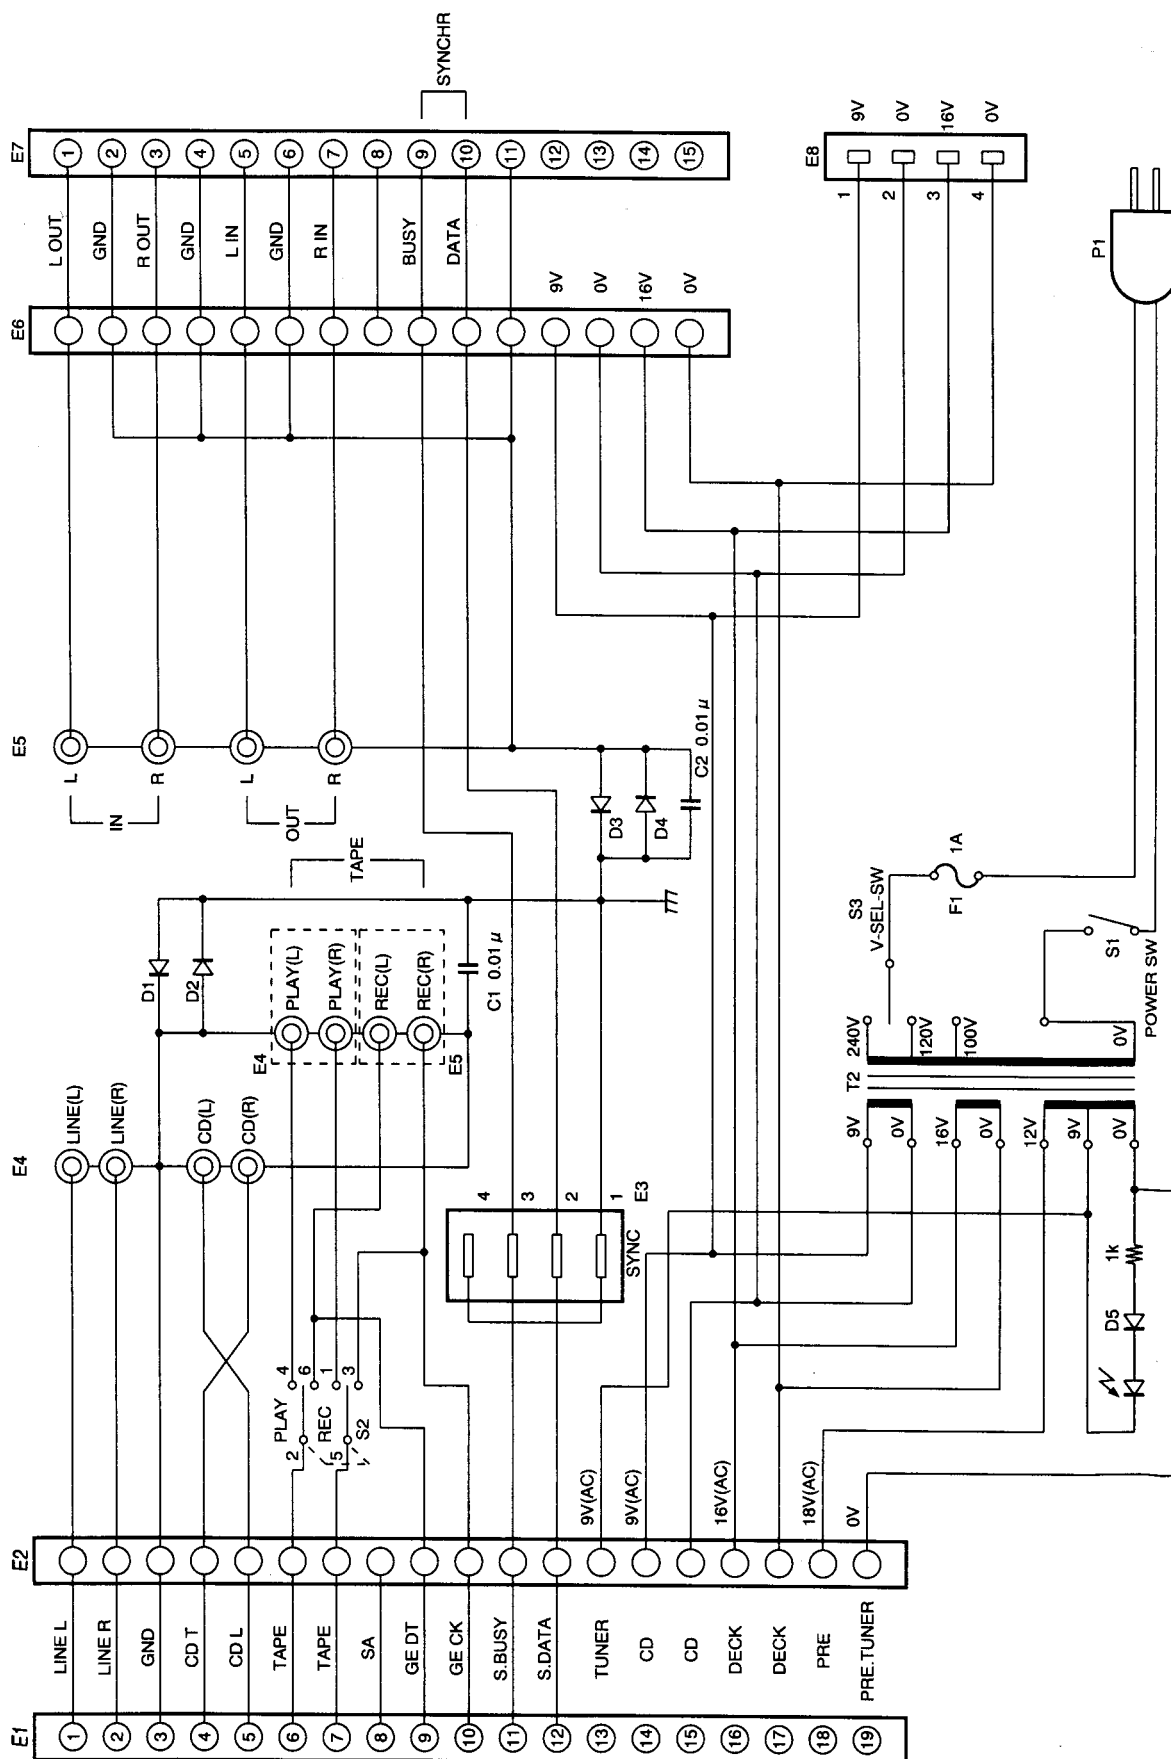

< NOTE >For limited power supply's capacity, maximum connection is only one sets.

Do not connect a set together both with the 15 pin terminal and 19 pin terminal.

In/output signals will shift as specified in the caution label when A-E5, A-E7, X-E5, X-ME5, X-E7, and X-ME7.

CIRCUIT DESCRIPTION

BLOCK DIAGRAM

CIRCUIT DESCRIPTION

1-3 Backup operation

The receiver microcomputer goes into backup mode when the AC power goes off. Therefore, the last state when the power was turned off is stored the next time the power is turned on.

1) Backup mode

Each 1 ms, the receive microcomputer checks the CE port and if CE=low, it goes into backup mode. When it goes into backup mode, it carries out the series of operations below, then stops the main clock (8.38 MHz). It does not come out of backup mode until a reset is input.

2) Operations upon entry into backup mode

- Interrupts inhibited
- Mute on
- Fluorescent display drive stopped
- A/D stopped
- SIO stopped
- Subclock (32 kHz) stopped
- Interrupt enable flags all cleared
- Hard timer stopped
- Port data set to all 0s
- Port mode set
(Setting the input ports to input mode and the input/output ports and the output ports to output mode is easy.)
- Data set in backup check RAM (cleared in test mode)
- Main clock stopped (to go into stop mode)

3) Data restoration upon reset

When the system is reset, if the backup check RAM value matches the value set when the system went into backup mode, then the modes below are restored.

- AMP -

- Power mode
(If the last state was power on, the power is turned on when the system is reset.)

(If the last state was power off, the power is turned off when the system is reset.)

- Last selector mode
- Master volume
- EQ. and Presence modes
- Active N.B. state
- Last clock data
(However, the clock is not counted and the last time data blinks.)
- Program setting contents and setting mode
- Tuner -
- Last band and preset channels and frequencies
- Last frequency and preset channels for each band
- Preset memory data (Ch. 1 - Ch. 20)
- AUTO/MANUAL (MONO) mode

1-4 Default values

The microcomputer RAM is all cleared (initialized) to initialize the system (set).

1-5 Initialization conditions

- When the AC power is turned on while pressing the main unit ENTER key
- During serial test mode, when serial code C27DH is received
- When the power cord is unplugged during test mode entered with a key on the main unit or during serial test mode
- When the backup data is destroyed

Under the above conditions, the receiver microcomputer is initialized. When it is initialized, it goes into the states in the table below (default states).

Default states

System	Power off
Clock Prog.	Clock stop (0:00 a.m.) Prog. operation mode:OFF Prog. 1: ON=0:00AM OFF=0:00AM MOD=PLAY SOC=TUNER (Ch 1) Prog. 2: ON=0:00AM OFF=0:00AM MOD=PLAY SOC=TUNER (Ch 1)
Amp	VOLUME: 7SEG=5 (μPC1853 VOL data=8) Selector: TUNER EQ.:OFF PRESENCE:OFF LONG PLAY:OFF ACTIVE N.B.:OFF MUTING:OFF
Tuner	Band:FM Last band FM: P.CH=--CH FREQ=min (76.0 MHz or 87.5 MHz) AM (MW): P.CH=--CH FREQ=min (530 kHz or 531 kHz) LW: P.CH=--CH FREQ=min (153 kHz) P. CH memory Ch. 1 - Ch. 20: Test frequency Tuning mode:AUTO (AUTO STEREO)

CIRCUIT DESCRIPTION

1-6 Timer operation

There are two program timers, Prog. 1 and Prog. 2. There are three execution modes: Prog. 1 only execution, Prog. 2 only execution, and Prog. 1 and Prog. 2 execution. The system is switched among these execution modes by pressing the ►► (EXEC.) key with the power off.

Each program timer operates while the power is off when its execution mode is on. However, if the on time and the off time are the same, they do not operate even if their execution mode is on.

When the power is turned on with the program timer, the display for whichever of Prog. 1 or Prog. 2 is operating blinks on/off every 500 ms. When the mode switches to normal power on, this blinking stops. In the current specifications, since program timer control becomes impossible when the power is on, when the power is turned on with a program timer, this is indicated. The only way to leave the mode of the power having been turned on by a program timer is to turn the power off, then on again.

CIRCUIT DESCRIPTION

X05-4442-70 (T, E)

DC voltages are as measured with a high impedance voltmeter during reception of the FM broadcast signal (with a signal strength of 60 dB at the ANT terminal). Values may vary slightly due to variations between individual instruments or/and units. Values in parentheses are as measured during reception of the AM broadcast signal (with a signal strength of 60 dB at the ANT terminal).

Les tensions c.c. doivent être mesurées avec un voltmètre à haute impédance pendant la réception d'un signal de programme FM (avec une force de signal de 60 dB à la borne ANT). Les valeurs peuvent différer légèrement du fait des variations inhérentes aux appareils et aux instruments de mesure individuels. Les valeurs entre parenthèses doivent être mesurées pendant la réception d'un signal de programme AM (avec une force de signal de 60 dB à la borne ANT).

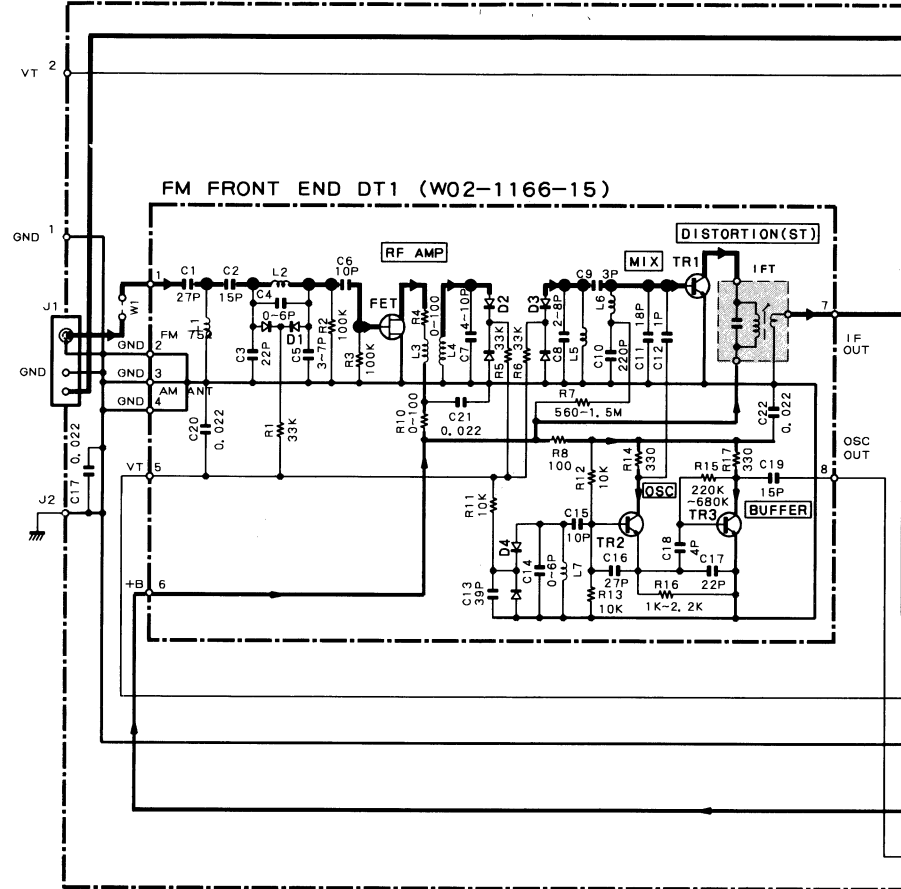

Die angegebenen DC-Spannungen müssen mit einem Voltmeter hoher Impedanz während der Empfangung eines FM-Programmsignals (mit einer Feldstärke von 60 dB an der Antennenanschlussschleife) gemessen werden. Die angegebenen Werte können sich geringfügig unterscheiden, da es sich um Werte einzelner Instrumente handelt. Die Werte in Klammern müssen während der Empfangung eines AM-Signals (mit einer Feldstärke von 60 dB an der Antennenanschlussschleife) gemessen werden.

A-E5/L

SPECIFICATIONS

A-E5

FM Tuner section

Tuning frequency range	87.5 MHz ~ 108 MHz
Sensitivity (IHF)	13.2 dBf (1.2 μ V at 75 Ω)
Signal to noise ratio at 1 kHz	
MONO	75 dB (65 dBf input)
STEREO	68 dB (65 dBf input)
Selectivity (IHF \pm 400 kHz)	50 dB
Stereo separation (IHF at 1 kHz)	40 dB
Frequency response	30 Hz ~ 15 kHz + 0.5 dB, - 3 dB

AM Tuner section

Tuning frequency range	
9 kHz step	531 kHz ~ 1,602 kHz
10 kHz step	530 kHz ~ 1,610 kHz
Usable sensitivity	12 μ V / (500 μ V / m)
Signal to noise ratio	48 dB

A-E5L

FM Tuner section

Tuning frequency range	87.5 MHz ~ 108 MHz
Sensitivity (DIN at 75 Ω)	
MONO	1.0 μ V / 11.2 dBf
Signal to noise ratio	
(DIN weighted at 1 kHz, 65.2 dBf input)	
MONO	65 dB
STEREO	62 dB
Selectivity (DIN \pm 300 kHz)	64 dB
Stereo separation (DIN at 1 kHz)	40 dB
Frequency response	30 Hz ~ 15 kHz + 0.5 dB, - 3 dB

MW Tuner section

Tuning frequency range	531 kHz ~ 1,602 kHz
Usable sensitivity	12 μ V / (500 μ V / m)
Signal to noise ratio	48 dB

LW Tuner section

Tuning frequency range	153 kHz ~ 279 kHz
Usable sensitivity	22 μ V
Signal to noise ratio	45 dB

Amplifier section

Rated power output	60 W + 60 W (EIAJ, 6 Ω)
Total harmonic distortion	0.09 % (1 kHz, 1 / 2 Rated power, 6 Ω)
Signal to noise ratio	81 dB (IHF'66)
Input sensitivity / Impedance	
AUX	200 mV / 47 k Ω
MIC	3.5 mV / 22 k Ω
Output level / Impedance	
SUPER WOOFER PRE OUT	2.0 V / 600 Ω
OMNI PRE OUT	1.0 V / 1 k Ω

[General]

Power consumption	150 W
Dimensions	W : 270 mm (10-5 / 8") H : 205 mm (8-1 / 16") D : 293 mm (11-9 / 16")
Weight (net)	5.8 kg (12.8 lb)

Amplifier section

Rated power output	55 W + 55 W (DIN, 6 Ω)
Total harmonic distortion	0.09 % (1 kHz, 1 / 2 Rated power, 6 Ω)
Signal to noise ratio	81 dB (IHF'66)
Input sensitivity / Impedance	
AUX	200 mV / 47 k Ω
MIC	3.5 mV / 22 k Ω
Output level / Impedance	
SUPER WOOFER PRE OUT	2.0 V / 600 Ω
OMNI PRE OUT	1.0 V / 1 k Ω

[General]

Power consumption	150 W
Dimensions	W : 270 mm (10-5 / 8") H : 205 mm (8-1 / 16") D : 293 mm (11-9 / 16")
Weight (net)	5.8 kg (12.8 lb)

KENWOOD CORPORATION

14-6, Dogenzaka 1-chome, Shouya-ku, Tokyo, 150 Japan

KENWOOD SERVICE CORPORATION

P.O. BOX 22745, 2201 East Dominguez St., Long Beach, CA 90801-5745 U.S.A.

KENWOOD ELECTRONICS CANADA INC.

KENWOOD ELECTRONICS LATIN AMERICA S.A.

P.O. BOX 55 2791, Piso 6 Plaza Chase, Cl. 47 y Aquilino de la Guardia, Panama, Republic of Panama

TRIO-KENWOOD U.K. LIMITED

KENWOOD House, Dwight Road, Watford, Herts, WD17 8EB United Kingdom

KENWOOD ELECTRONICS BENELUX N.V.

Mechelsesteenweg 418 B-1930 Zaventem, Belgium

KENWOOD ELECTRONICS DEUTSCHLAND GMBH

Rembrücker Str. 15, 63150 Hausenstamm, Germany

TRIO-KENWOOD FRANCE S.A.

13 Boulevard Ney, 75018 Paris, France

KENWOOD ELECTRONICS ITALIA S.p.A.

Via G. Sironi, 7/9 20129 Milano, Italy

KENWOOD ESPAÑA S.A.

Bolivia, 239-08020 Barcelona, Spain

KENWOOD ELECTRONICS AUSTRALIA PTY. LTD. (A.C.N. 601 499 074)

P.O. BOX 504, 8 Figgies Drive, Australia Centre, Hornsby, N.S.W. 2140, Australia

KENWOOD & LEE ELECTRONICS, LTD.

Unit 3712-3724, Level 37 Tower 1, Metroplaza, 223 Hing Fong Road, Kwai Fong N.T., Hong Kong

KENWOOD ELECTRONICS SINGAPORE PTE LTD.

No. 1 Genting Lane # 07-00, KENWOOD Building, Singapore, 1334

KENWOOD ELECTRONICS (MALAYSIA) SDN BHD

10th Floor, Block B, Wisma Semantan, No. 12, Jalan Goleggang, Bukit Damansara, 50490 Kuala Lumpur, Malaysia

KENWOOD follows a policy of continuous advancements in development.
For this reason specifications may be changed without notice.

Note:

Component and circuitry are subject to modification to insure best operation under differing local conditions. This manual is based on the U.S.A. (K) standard, and provides information on regional circuit modification through use of alternate schematic diagrams, and information on regional component variations through use of parts list.
